Harsh Shandilya

msfjarvis@gmail.com | Ghaziabad, Uttar Pradesh | msfjarvis.website

Education	**IME College**, *BCA in Computer Science* Ghaziabad	August 2018 | August 2021

Work experience **Projekt Development LLC**, *Android Engineer*   August 2017 | July 2019
Remote

- Maintainer of substratum theme engine
- Core developer on hyperion launcher
- DevOps (CI/CD/Documentation sites)

Skills

Programming Languages:	Java, Kotlin, Python, Rust
DevOps skills:	Docker, Bash scripting
Linux:	Kernel testing and debugging
Design:	UI and UX research and development

PROJECTS

substratum theme engine, *Java*
Leading open source theme engine for the Android platform with over 1,000,000+ downloads on the Google Play Store
https://github.com/substratum/substratum

Viscerion, *Java, Kotlin*
Unofficial Android client for the WireGuard VPN protocol, rewritten entirely in Kotlin, redesigned and fleshed out with extra features not available on the official app. Over a thousand downloads on the Play Store with an average rating of 4.6
https://github.com/MSF-Jarvis/viscerion

Android Password Store, *Java, Kotlin*
Android application compatible with ZX2C4's pass command line application. Since I joined as a co-maintainer, I've significantly improved both UI and UX of the application as well as rewritten significant parts into Kotlin.
https://github.com/zeapo/Android-Password-Store

substratum lite, *Kotlin*
substratum, reimagined and rebuilt from the ground up. Currently in open beta with very positive reception from users.
https://kutt.it/subslite

Open source involvement, *Java, Kotlin, Python, Bash*
Contributor to a significant number of open source projects
https://github.com/msfjarvis
